

2020 043 Hot Water Boiler

We are have looking in to the purchase of 2 additional hot water boilers for the last few months. I located 3 hot water boilers that looked satisfactory for what we are looking for they are as follows:

1) Catering Appliances Superstore – Instanta WMS10 Sureflow wall mounted water boiler

https://www.catering-appliance.com/instanta-wa10n-autofill-water-boiler-wall-mounted?gclid=EAlalQobChMI1cjsldO35wIVjbHtCh08bwXBAAAYBCAAEgJhW_D_BwE

Cost for this hot water boiler is £499 + VAT – This is the same manufacturer as the one we currently have in the Main Hall – which caretaking staff believe would be the best option to go for.

I have investigated the cost for this machine and this is the cheapest price online – nearest cost is from CS Catering at £530 + VAT

This comes with a 2 year parts and labour warranty

2) Catering Appliances Superstore - Instanta WMS2 (WA2N) 2.5 Ltr Autofill Water Boiler Wall Mounted (smaller options for small Hall)

<https://www.catering-appliance.com/instanta-wa2n-autofill-water-boiler-wall-mounted>

This is a small version of the machine which costs £406.99 + VAT

Alternatively, you can go with a different make and get it cheaper

3) Catering Appliances Superstore - Burco AFF5WM (069801) 5 Ltr Wall Mounted Autofill Water Boiler with Filtration

<https://www.catering-appliance.com/burco-aff5wm-069801-5-ltr-wall-mounted-autofill-water-boiler-with-filtration>

this one costs £329.99 + VAT – however not the same make are our current machine with caretakers feel would be easier

Cost for installation of the hot water boiler is £206.17 + VAT (per machine)

Summary

Quote 1 for Rec Hall and Quote 2 for small hall total £905.99 + installation £412.34 + VAT £1318.33 + VAT

X2 Quote 3 Machines - £659.98 + Installation £412.34 + VAT Total £1072.32 + VAT

Or just get one for Recreation Hall (capacity in the small hall / use of the machine – could they use the new urn we purchased end of the year) – this cost would be £706.16 (for quote 1 machine)

Propose the funding comes from EMR for hall planned improvements (currently at £30,000)

Recommendation

I would recommend we look to purchase a machine for the recreation hall and leave the small hall with the urn – this will reduce the expenditure – and we can make sure happy with the equipment / see if demand is there to install one in the small hall in the future cost for my recommendation would be £706.16
