

Dear All,

I am writing to draw your attention to the latest website update on the [Marks Tey Station Bridge, Vehicle Restraint System \(VRS\)](#) webpage.

**Progress update**

The vehicle restraint system (VRS) barriers have been installed on both sides of the bridge and we are waiting for the wire restraining rope to be delivered to site and to be installed.

The rebuilding of the road has commenced and foundations for the footway are underway. The next phase includes installing new kerbing and utility companies returning to site to complete their diversion work on their apparatus.

Photos which show recent work can be found on the scheme [webpage](#).

Kind regards,
